## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 4-10, 12-16, and 18-34 are allowed.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The closest reasonable prior art to the instant application does not disclose a combination imaging/sensor catheter including conductive coils and non-conductive material disposed over the sensor but still retaining traces in the non-conductive material to electrically couple the imaging device to an energy source. As with the allowance of patent 7,081,094 to the same inventor, these elements are novel and not disclosed elsewhere, but separating this application from the '094 patent is the placement of traces over the sensor for electrical coupling and also the non-conductive layer of epoxy used in claim 16 for imbedding the distal connections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
